ContentX: Gen AI Platform for Automated Content Transformation

SMART INDIA HACKATHON 2026

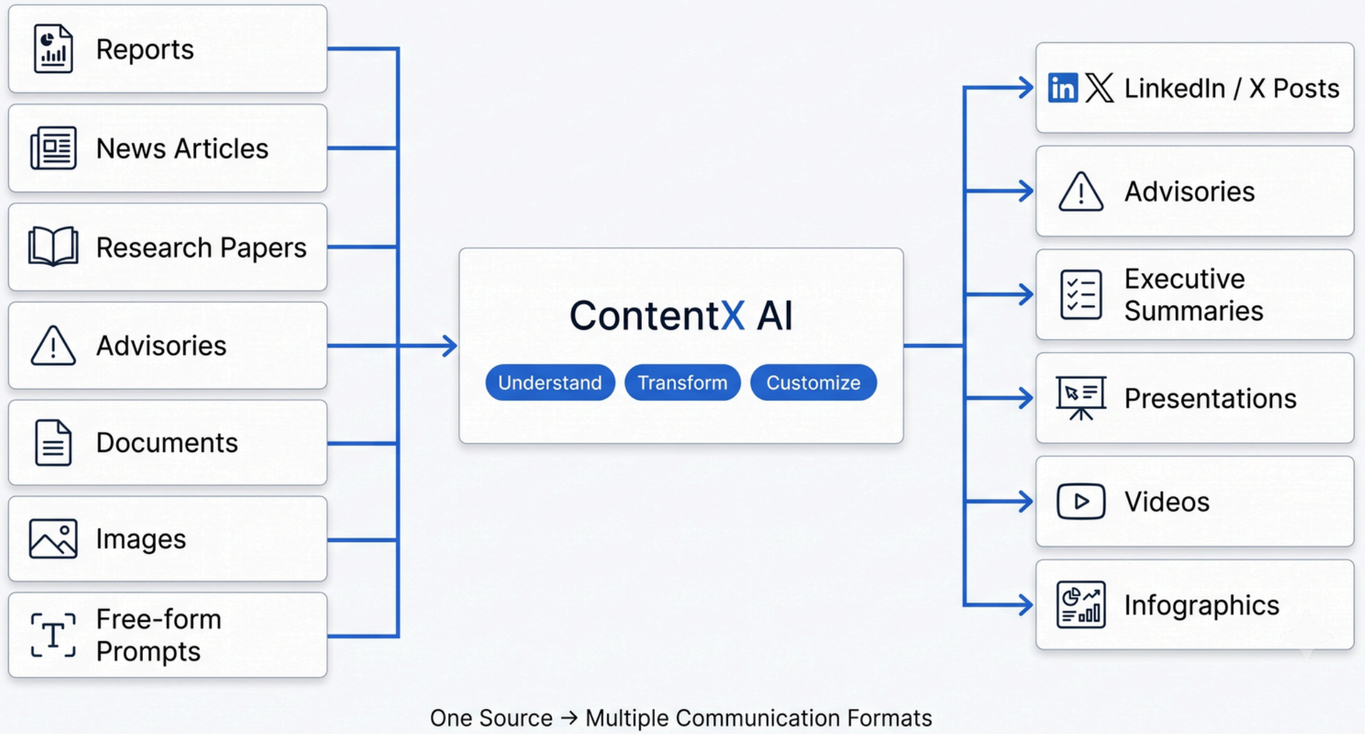

Real-world issue: Organizations spend significant time manually converting reports, articles, advisories, and research into different communication formats.

Why important: Manual content creation is time-consuming, repetitive, and inconsistent, especially when the same information needs to reach multiple audiences and platforms.

Solution: Our platform transforms a single source into multiple outputs like LinkedIn/X posts, summaries, presentations with customizable audience and style.

TECHNICAL APPROACH

SMART INDIA HACKATHON 2026

Tech Stack Used

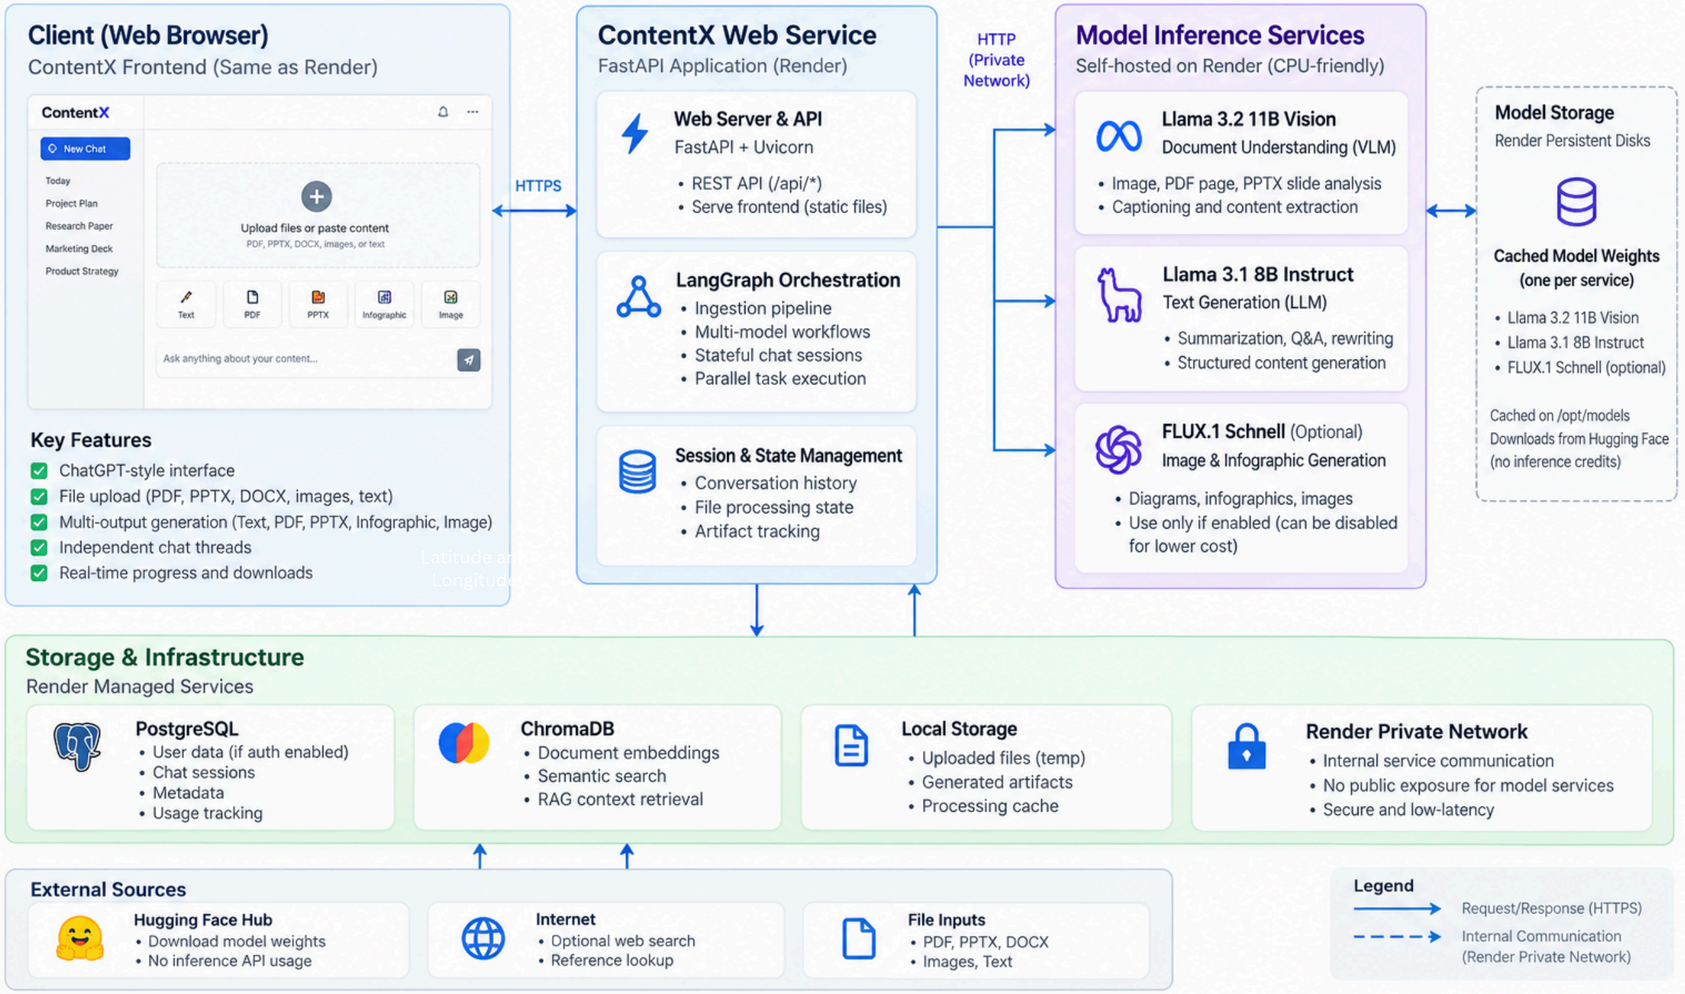

- React / Next.js
- FastAPI
- LangGraph
- Docling
- SigLIP + VLM
- Hosted SLM API
- Microsoft Harrier OSS v1 0.6B
- Chroma Cloud
- LangGraph + Chroma Cloud
- SLM + Rule-based Validation
- FLUX API
- SVG / HTML Rendering
- Python (Output Generation)
- S3 / Cloud Storage
- Docker
- Cloud Deployment
- REST / JSON
- Git / GitHub

ContentX

From Content to Transformations. All in One.

System Architecture

Content Ingestion → Understanding → Multi-Output Generation

Detailed Report

Metamorph45

FEASIBILITY AND VIABILITY

SMART INDIA HACKATHON 2026

FEASIBILITY ANALYSIS

Infrastructure Reusability: Uses managed cloud APIs, requiring zero custom hardware or model training.

Scalable Deployment: Decoupled architecture scales seamlessly from single prompts to massive reports.

Cost Effectiveness: Efficient SLMs cut costs while reducing manual rewriting effort 80%.

Grounded Accuracy: Verification loops ensure zero factual drift across all output channels

VIABILITY

Proven Concept: Addresses huge market demand by automating manual content repurposing across enterprise teams.

Builds Public Trust: Verification loops eliminate AI hallucinations, ensuring credible, factually grounded multi-channel communications across all target platforms.

Guarantees Accountability: Page-level source provenance maps every generated claim directly to original reference text for full factual verification.

Ensures Authority Engagement:- Intuitive controls allow operators to transform complex reports into publication-ready assets effortlessly.

BUSINESS POTENTIAL

Enterprise Cost Savings: Automates manual content rewriting, reducing operational creation overhead and labor costs by over 85%.

Scalable B2B Revenue Model: Generates recurring revenue through tiered enterprise SaaS subscriptions, API volume pricing, and custom integrations.

High Market Expansion: Unlocks vast TAM across cybersecurity, government agencies, media houses, PR firms, and research institutions.

Metamorph45

IMPACT AND BENEFITS

SMART INDIA HACKATHON 2026

Higher Productivity

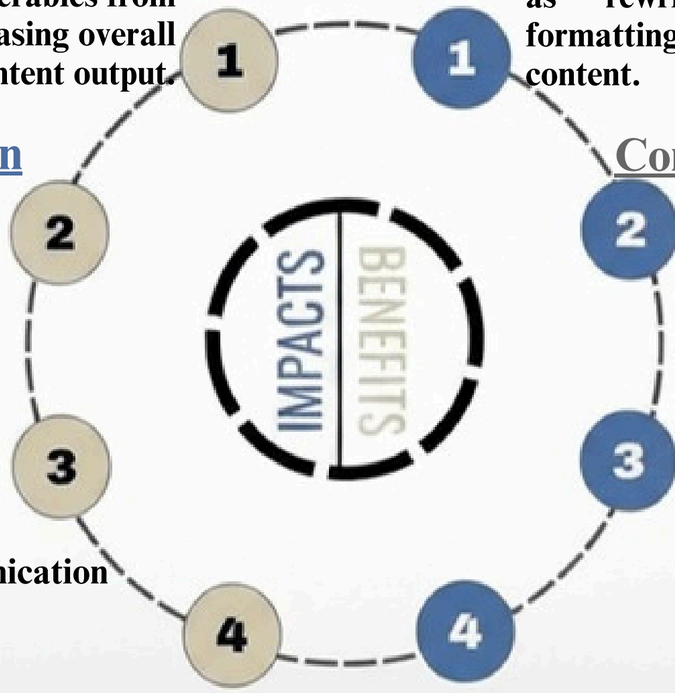

Enables teams to produce multiple communication deliverables from a single source, increasing overall content output.

Faster Communication

Accelerates the conversion of information into publication-ready formats, reducing content turnaround time.

Wider Information Reach

Allows the same information to be adapted for different audiences, platforms, languages, and communication objectives.

Reduced Manual Effort

Automates repetitive tasks such as rewriting, summarizing, formatting, and repurposing content.

Consistent Communication

Maintains consistent messaging, tone, structure, and style across different generated deliverables.

Customized Outputs

Allows users to control audience, tone, language, detail level, and communication objective for each output.

Scalable Content Operations

Enables organizations to handle large volumes of information without proportionally increasing manual content-production effort.

Multiple Outputs from One Source

Generates social posts, advisories, summaries, presentations, videos, and infographics from the same source content.
